

Chemistry 161-06 (CHEM&161) Syllabus, Fall, 2017

Welcome to Chemistry!

We would like to help you succeed in

- the preparation for your intended major
- your lifelong application of Chemistry in whatever your career becomes
- the outcomes of this course

We want to engage you to

Learn Actively,

You'll be asked to learn from sources, learn by doing, and learn by explaining content and processes to someone else.

Think Critically, Creatively and Reflectively,

You'll be asked to solve problems, to explain solutions to someone else, and to reflect on others' alternative approaches. You will enrich your attention to detail.

Communicate with Clarity and Originality,

You'll be asked to make verbal explanations, give clear answers in writing, teach content to the class, and communicate effectively in a laboratory setting both verbally and in your records.

and

Interact in Diverse and Complex Environments.

You'll be asked to interact among students of different cultures, diverse levels of preparation, diverse family and personal situations. You will be expected to be an effective and sought-after team member.

This course will immerse you in these learning outcomes.

We are a partnership of:

- your classmates
- the Cascadia community
- your instructor

David Reichgott (CC2 389)

dreichgott@cascadia.edu

425-352-8165

Please drop in any time my door is open.

Chemistry 161-06 (CHEM&161), Fall Quarter '17 Syllabus

Chem&161 Sec. 06 (item #1900) : Tu, Th 3:30–5:35 PM in CC1-110; Lab W 3:30 - 6:00 PM in CC1-330

Unless pre-approved, you are required to attend the class and laboratory section that you are registered for.

Description: NS - In this first in a three-quarter sequence for science and engineering majors, students explore structure and behavior of matter, chemical and physical properties and processes, mass and energy relationships, and history in chemistry to understand the scientific method. Laboratory extends content, emphasizes safety and critical thinking about experimental uncertainty. (Lab)

Prerequisites: Completion of CHEM&139 with a grade of 2.0 or higher or one year of high school chemistry; and completion of MATH&141 or MATH 147 with a grade of 2.0 or higher. (CHEM&121 will not be accepted as a prerequisite.)

Instructor: Dr. David Reichgott (CC2-389)
Phone/Voice Mail 425-352-8165 email: dreichgott@cascadia.edu
Office Hours: Tu, W, Th 2:30 – 3:20 pm (W may be in CC1-330)
Appointments and “drop-ins” are welcome; **stop in any time my door is open.**
Web page: <http://faculty.cascadia.edu/dreichgott/> (contains link to CHEM&161 web page)
This optional page will contain all course information and assignments plus any class-wide data from lab.

Text: Gilbert, Kriss, Foster, Davies, “Chemistry: The Science in Context,” 4th ed (2105); ISBN 978-0-393-91937-0 (hardcover; loose-leaf and ebook formats are welcome). Access to SmartWork is not required.

Also Required: A hardbound (not spiral) 7½ x 9¼ laboratory notebook or similar size; Safety goggles. A calculator that is not a telephone. Access to Canvas.

Canvas (REQUIRED): Course documents, including Unit Outcomes, daily Power Point slides, assignments and the laboratory manual are available on Canvas; content is located under “Files.” **When printing Power Point content** be sure to select “Print What ...Handouts...6 per page”. Please also see expectations for appropriate use under “Course Websites”, below.

In case of college closure or instructor’s absence: In the event of a campus closure, please log into CANVAS at <http://cascadia.instructure.com> for announcements and instructions. On each “out” day a set of instructions, including options for lab and document delivery, will be posted under Files, in a document titled “Instructions for (date)”. All assignments that must be turned in must be done in Microsoft Word (or Works word processor, or .txt) format or scanned to a png or pdf format, and delivered by email to dreichgott@cascadia.edu. Photographic or low-quality scans may not be accepted. All aspects of academic honesty must be followed (see below). For CANVAS instructions, including technical support information, please visit <http://www.cascadia.edu/programs/elearning/canvasinstructions.aspx>

Reserve Items (optional): Available at the Library, optional text: “Introductory Chemistry,” M. S. Cracolice & E. I. Peters; Available at the Library, CD: “Graphical Analysis”, Vernier Software (licensed for student installation).

Content: Chapters 1 through 5 and 7 of Gilbert, includes Dalton’s atomic theory and modern applications of the quantum theory of the atom, assigning and communicating uncertainty in measurement-based properties, major classes of chemical reactions, mass and molecular relationships in chemical formulas, equations and reactions, energy changes that accompany chemical changes, atomic structure and the description of electrons, the reflection of atomic structure in periodic properties. Comprehensive laboratory applies the above concepts and emphasizes group interaction.

Outcomes:

Learn Actively - Learning is a personal, interactive process that results in greater expertise and a more comprehensive understanding of the world.

Develop understanding and use of symbols, formulas, chemical equations and graphs to describe atoms, compounds, simple reactions, and enthalpy changes

Describe the formation and properties of ionic and molecular compounds

Use periodic table to gain information about the elements and predict their properties and reactivity

Identify major classes of reactions, balance equations and predict products

Learn by describing how to solve problems, both individually and collaboratively

Deepen conceptual and analytical understanding of chemical concepts and applications by engaging in discussion and group assignments

Demonstrate mathematical proficiency, including use of metric system, scientific notation, significant figures, ratios and simple statistics

Think Critically, Creatively and Reflectively -- Reason and imagination are fundamental to problem solving and critical examination of ideas.

Given conceptual information and data, develop hypotheses and test relationships

Develop strategies to approach, solve, and understand problems involving composition, stoichiometry, and enthalpy change on both conceptual and quantitative levels

Distinguish between exothermic and endothermic reactions and relate to heat flow in a chemical change

Develop an understanding of what a scientific theory means, explain the process of generating scientific knowledge using an example in chemistry, and explain which observations support or refute a theory

Examine connections between chemical concepts and other disciplines, and learn examples of the impact of chemistry on the modern world

Develop skills for assessing uncertainty for the purpose of designing experiments and communicating the reliability of results

Communicate with Clarity and Originality - The ability to exchange ideas and information is essential to personal growth, productive work, and societal vitality.

Communicate descriptions of matter and concepts of chemical change through peer interaction and written laboratory reports

Construct, organize and interpret graphs and tables containing chemical data

Express and interpret uncertainties in quantitative information

Use computer resources to acquire data and present results and laboratory reports

Interact in Diverse and Complex Environments - Successful negotiation through our increasingly complex, interdependent and global society requires knowledge and awareness of self and others, as well as enhanced interaction skills.

Appreciate the complexity and multiple ways of arriving at answers

Work with peers to perform laboratory experiments and solve problems

Use chemistry lab techniques and equipment to gain confidence in ability to perform chemical procedures

Develop insights into the interactions between theory and experimentation

In all group work, listen and contribute with respect and honesty

With a group, teach an aspect of Chemistry to the class incorporating the above.

Assignments: A "Unit Syllabus" for each of three units will be distributed with reading, and suggested problems.

- Graded homework assignments: problems and due dates are specified in each unit's syllabus.
- Four required, in-class, graded Group Sheets and several ungraded worksheets.
- Late assignments will be accepted (minus 10 to 20%) until the assignment is returned to the class.
- Assignments are expected to be submitted in person. If this is impossible, any assignment transmitted electronically must be in .doc, .docx, .pdf, .jpg or .png file format, and of a file size that does not inhibit transmission. Having a document rejected by an email system does not relieve you of the need to submit it on time. If scanned, the readability of the document is the responsibility of the sender.
- Group presentation of assigned content.

Class-time focus and student responsibility: This course is heavy with content, and it is elected by students with diverse future pathways, some of which require all the content to be covered. Our class-time will be focused on those areas that are best learned through collaborative activities, or are those where instructor support is most needed. For us to be successful, there is a need for you to be responsible for your own learning of content not covered in class, and to use the study skills of an independent learner. The "Unit Syllabus" is one of the ways to support you in your efforts. Cascadia's expectations for classroom behavior conform to the Washington Administrative Code (WAC). These may be found in the Student Handbook or at http://www.cascadia.edu/academic_resources/handbook.aspx. Cell phones and other communication devices are not to be used in the classroom or laboratory.

Study technique recommendations:

- Check the outcomes on the Unit Syllabus for the class ahead of time.
- Skim the text sections before class, paying close attention to bold-face vocabulary terms, boxed items, and figures. This should take no more than 20 minutes.
- Read the assigned text sections as soon as possible after class.
- Compare the outcomes to your class notes, taking care to review material not covered in class.
- Learn actively by explaining concepts and relationships to someone else.
- Learn collaboratively by solving recommended exercises in a study group.

Exams: Three hour exams during classes. The examinations are cumulative to the extent that concepts and skills introduced in earlier units are applied in later units. There is no comprehensive final exam.
Exams can be made up only for unusual circumstances and **only** if I am notified in advance.

Quizzes: Quizzes are short assessments of your readiness for class, based on bold-face terms and boxed items in the day's reading assignment, given during the **first** five minutes of each class, unless noted in the Unit Syllabus. Makeups are not possible (including arriving late) unless arranged in advance.

Grading:

Hour Exams	50, 55, 45 pts.	150 pts.
Quizzes	14 x 3 pts.	42 pts.
Group Sheets	3 x 10 + 1 x 8 pts.	38 pts.
Graded Homework	5 x 10 pts.	50 pts.
Presentation		40 pts.
Laboratory*	see below	180 pts.
Total:		500 pts.

*This is a laboratory science course that may be used to satisfy college requirements. To meet these requirements and to meet prerequisites of subsequent courses, you must obtain a passing grade average in the laboratory component of the course. Laboratory content is also testable on the hour exams to the extent that the lab content overlaps class content.

Grades are assigned in proportion to your percent score (you do not compete with each other):

4.0 :	90%-100%	2.0 - 2.4	65% - 74%
3.5 - 3.9:	85%-89%	1.0 - 1.9 :	55%-64%
3.0 - 3.4:	80%-84%	0.0 :	Below 55%
2.5 - 2.9 :	75% -79%		

Other grades (I, N, P/NC, V, W) may be assigned in compliance with the College academic policies, which can be found at: http://www.cascadia.edu/academic_resources/academic_policies.aspx

Policy on Incomplete (I) and Withdrawal (W) grades: An Incomplete, as described in the College Catalog, is arranged for ahead of time with the instructor through an Incomplete Contract, and only in the case where the majority of the instruction has been completed. I will interpret this as having missed no more than three class sessions and one laboratory (unless a makeup is possible). A grade will be assigned when the contract is completed. A Withdrawal may be made without instructor approval through November 8th; after that date an application and approval must be made through Student Services – Kodiak Corner.

Transfer Issues

- CHEM&161 transfers to the University of Washington as CHEM 142. Special circumstances apply when transferring to semester schools, and Advising needs to be consulted at the transfer school.
- For transfer to the University of Washington CHEM&162 and CHEM&163 must be taken at the same college; however, the UW Engineering School accepts 162 (without 163) to satisfy the Major-Ready Pathways that require only 161 and 162.
- The University of Washington will not accept credit for **both** CHEM&121 and CHEM&161.

Cascadia Community College Syllabus Learning Agreement

Pluralism and Diversity: Cascadia believes in Pluralism, an intentional culture where everyone's history contributes to the collective success of our community.

Cascadia is committed to creating a supportive environment for a diverse student, faculty, and staff population. Individual differences are celebrated in a pluralistic community of learners.

Cascadia does not discriminate on the basis of race, color, religion, gender and/or sex, sexual orientation, national origin, citizenship status, age, marital or veteran status, or the presence of any sensory, mental or physical disability, or genetic information, and is prohibited from discrimination in such a manner by college policy and state and federal law. The following office has been designated to handle inquiries regarding non-discrimination policies and can direct inquiries to the appropriate office for ADA-related requests: Director of Human Resources, Office CC2-280, 425-352-8880.

Title IX: Title IX of the Education Amendments of 1972 prohibits discrimination on the basis of sex in education programs or activities that receive Federal financial assistance. In compliance with Title IX, Cascadia is committed to providing an educational environment free from sexual harassment, including acts of sexual violence or sexual assault. The College is equally committed to ensuring that those who raise complaints or participate in the investigation and resolution of complaints are free from retaliation. To raise a complaint or voice a concern with Cascadia's compliance with Title IX, contact Martin Logan, Executive Director of Human Resources, at mlogan@cascadia.edu or 425-352-8262.

Academic Honesty: The College regards acts of academic dishonesty, including such activities as plagiarism, cheating and/or violations of integrity in information technology, as very serious offenses. In the event that cheating, plagiarism or other forms of academic dishonesty are discovered, each incident will be handled as deemed appropriate. Care will be taken that students' rights are not violated and that disciplinary procedures are instituted only in cases where documentation or other evidence of the offense(s) exists. A description of all such incidents shall be forwarded to the Student Conduct Officer, where a file of such occurrences will be maintained. The Student Conduct Officer may institute action against a student according to the college's disciplinary policies and procedures as described in the *Student Handbook*: http://www.cascadia.edu/academic_resources/handbook.aspx

In this class, any work found to involve academic dishonesty will be given a grade of 0. Guidelines specific to this course:

The following are situations where I expect you to get help, share ideas, and work cooperatively:

1. Group sheets and worksheets.
2. Prepared Problems and graded homework when you are stuck (but please see below).
3. Preparing for lab (except what you actually write on your pre-laboratory assignment).
4. All aspects of in-laboratory activities.
5. Working-up laboratory data for your report and brainstorming ideas about report questions.

The following are examples of situations where I expect that your work will be **entirely** your own:

1. All aspects of examinations.
2. All written aspects of graded homework assignments.
3. All written aspects of pre-laboratory assignments.
4. All written aspects of laboratory reports.

The key distinction is when you write something down, it represents your own communication of your understanding. It is inappropriate to copy anyone's work or provide your answers to others, except where you are sharing data.

Student Rights and Responsibilities: Cascadia is a student-centered college, operated to provide knowledge and skills for the achievement of learners' academic, professional and personal goals. Inherent in the college's mission are certain rights and freedoms needed for learning and personal development. Admission to Cascadia provides these rights to students, and also assumes that students accept the responsibility to conduct themselves in ways that do not interfere with the purposes of the college in providing education for all of its learners. For the complete policy, see the Student Code of Conduct in the Student Handbook at http://www.cascadia.edu/academic_resources/handbook.aspx

Course Websites

Nearly every course at Cascadia has one or more dedicated websites. Our course uses [CANVAS](#) as noted above. Access to course websites is through Internet browsers, and students will use personal user IDs and passwords to log in.

- Students may not share their user IDs and passwords with anyone else or allow anyone else to participate in course sites on their behalf.
- Students need reliable access to the Internet. Some devices, such as smartphones, cannot access all aspects of CANVAS and most other course websites. Cascadia does not recommend that students attempt to complete a course using only a smartphone. Computers are available in many locations on campus.

Technical support for accessing learning management systems is available at the Cascadia Learning Center.

Learning Center Services

To support student success, Cascadia offers a variety of support services through its Learning Center. The Learning Center, located in CC2-060 and CC2-080, provides tutoring in a range of subjects, space for students to work individually or in small groups, computer and printing resources, technology support, and graphing calculators available for checkout. [Click here for hours and contact information for the Learning Center.](#)

Online Tutoring and Writing Assistance

Cascadia provides online access to live tutors in a variety of subjects through the Western e-Tutoring Consortium. This service includes live, interactive sessions and asynchronous feedback through an Essay Center. Many subjects have

convenient tutoring hours late into the evening and seven days a week, depending on tutor availability; schedules are available online. To learn more or get started, visit the Learning Center's [tutoring webpage](#).

Disability Support Services: Cascadia provides services to help students with disabilities successfully adapt to college life. Students who meet specific criteria may qualify for reasonable academic accommodations. If you have or suspect you have a disability and need an accommodation please contact the front office in Kodiak Corner at 425-352-8860 to make an appointment, or email us at disabilities@cascadia.edu. Services and Accommodations through DSS are not retroactive. It is the student's responsibility to approach the faculty member with the accommodation letter as soon as it is issued from DSS.

Counseling services: If you have a personal problem or stress that is affecting you and would like to talk with someone, please contact [UWB's Mental Health Counseling Center](#). Counseling at Cascadia (provided through UWB) is confidential, professional and free (six sessions). Visit the Counseling Center front desk Monday through Friday, 8:30 a.m. to 5 p.m. or call 425-352-3183 for an appointment. The number for a 24-hour Crisis Line is 206-461-3222.

Advising: Students should schedule an appointment to meet with an advisor to consult about classes and degrees, and to create a tentative education plan. They can call 425-352-8860 or come to the Kodiak Corner to make an appointment. Appointments are not made via email. At the time of the appointment, they need to indicate which degree they are pursuing. See the Cascadia website <http://www.cascadia.edu/advising/academic.aspx> for information about Drop-In Advising hours.

Online Advising: Email advising is available at advising@cascadia.edu. Our distance advisor can answer most questions via email, but we don't schedule advising appointments via email.

Campus Closures and Inclement Weather: Information about signing up for alerts and notifications can be found at <http://www.cascadia.edu/services/emergency/alert.aspx>. The site includes instructions for subscribing to alerts. In the event of a campus closure, instruction for this class will continue on Canvas, as noted above.

In the event of inclement weather affecting morning classes, there will be notification on the local media by 5:30 a.m. Closure notices will be posted on Canvas and on the Cascadia web site. You may also call the main campus number: 425-352-8000 to hear a message that will be updated with the latest Cascadia closure information. Should the weather deteriorate during the day, you may check online, listen to the main campus message, check email or the media to hear news about closures or class schedule changes.

Emergency Procedures: Emergency procedures are posted in each classroom. To reach campus security personnel, dial 425-352-5222. City of Bothell fire and police may be reached by dialing either 9-9-1-1 or 9-1-1 from any campus phone. Campus emergency phones are located on campus walkways and parking lots.

Acceptable Use Policy on Information Technology: In general, the same ethical conduct that applies to the use of all college resources and facilities applies to the use of Cascadia's systems and technology. These systems may only be used for authorized purposes, using only legal versions of copyrighted software, and with consideration and respect for the conservations of resources and the rights of other users. For additional information, see the online version of the Student Handbook at http://www.cascadia.edu/academic_resources/handbook.aspx or go to the Open Learning Center for assistance with any questions.

Family Education Rights and Privacy Act (FERPA): Cascadia Community College complies with the Family Education Rights and Privacy Act (FERPA) of 1974 concerning the information that becomes a part of a student's permanent educational record and governing the condition of its disclosure. Under FERPA, students are protected against improper disclosure of their records. See http://www.cascadia.edu/academic_resources/handbook.aspx

Laboratory: There are nine laboratory experiments during your scheduled laboratory periods, including one exercise (Chemical Resource Materials) that is partially done outside of laboratory (see Schedule). Note that there will be no meeting in the last week's laboratory period for section -06 (12/13).

A. LABORATORY MANUAL

All laboratory experiments and supporting materials are in files located on Canvas. You are required to read, print, and bring the scheduled laboratory experiment to lab, and turn in the required Prelaboratory Assignment at the start of lab. Cascadia has a required Safety Protocol that is contained in the introductory file. **You are required to submit the signature form that is provided to you during the first laboratory period (parental signature if you are under 18).**

B. SAFETY GOGGLES AND ATTIRE

Safety goggles are available at the bookstore which must be worn in the laboratory any time chemicals or glassware are in use by anyone in the lab. You are required to have closed-toe shoes that also cover the top of the foot, and either long pants or another garment that covers the upper and lower legs.

C. LABORATORY NOTEBOOKS

All notes taken while in lab must be written in **ink** in your laboratory notebook. The notebook must be hardbound, similar in size to 7½" x 9¼", with either preprinted or handwritten page numbers. It should not have a flexible cover, nor

removable pages, nor a spiral wire binding. The following items must be included in your lab notebook for each experiment:

- Date and Title of experiment
- Page reference to manual or reference to handout where the procedure can be found
- Statement of purpose - one or two sentences completed **before** coming to the lab
- Entries specified by the Prelaboratory assignment
- An entry in your Table of Contents
- Notes the day of lab that your instructor specifies to place in your notebook
- Name of partner (if any) and references to co-workers' data.
- Data and notes taken during the experiment, recorded in time sequence. **Do NOT** transcribe the manual, but make page references to the manual (noting any procedure changes). Your entries, taken together with the manual or handout, should enable a co-worker to understand and reconstruct your results.

During the experiment no notes should be taken in the laboratory manual or on separate sheets of paper, and all notes should be taken in the lab notebook. If an error is made in the notebook, a single line should be drawn through it and initialed by you. If you decide to repeat a procedure, leave the original entry and make a statement that you are repeating it. **Pencil or "whiteout" should never be used in a lab notebook.** At the completion of each laboratory period, your notebook must be reviewed by a classmate other than your lab partner, and submitted to your instructor for initialing. Notebooks will be graded twice during the quarter for required elements, correct format, clarity of data, organization, and entries sufficient to allow another individual to understand what you have done and reconstruct your results.

D. ARRIVING LATE TO LAB

If you arrive late to lab, you are welcome; however, if the safety and procedure briefing has been completed you may participate only as an observer and at reduced credit (60 – 80% credit).

E. LABORATORY REPORTS

Both Pre-Lab and Post-Lab reports will be required for each experiment. The Pre-Lab report contains questions designed to allow you to gain some initial understanding of the experiment. To answer the Pre-Lab questions, a thorough and thoughtful reading of the experiment must be done. While you may consult with colleagues in the class about your responses to the Pre-Lab questions, you must provide your own individual, unique answers to these questions. Because the Pre-Lab questions are designed to prepare you for the experiment, **Pre-Lab reports are due at the beginning of each laboratory session. Failure to submit a Pre-Lab report at the start of lab will result in no credit given for that Pre-Lab report.**

The Post-Lab report allows you to reflect on the data collected in each experiment and to answer questions related to the experiment. You are encouraged to collaborate with your colleagues, but submit your own individual, unique report. Laboratory reports must **not** be written in your laboratory notebook. They may include pages from the manual and may require additional printed or handwritten pages of your own.

Laboratory reports will normally be due by the start of the second class following lab (Tuesday). **Late reports will automatically lose 10% (if within 24 hours), 20% (if later). They will not be accepted after the class' reports have been returned (usually the next laboratory period).** Report grades are based on: Complete and correct prelab. assignment (about 20%), accuracy and precision of results (about 20%), clear presentation of data (about 10 - 20%), accuracy of calculations (about 20%), complete and correct post-laboratory questions (about 20 - 30%). The lowest 20-pt. lab's score (or absence IF pre-approved) will be dropped.

F. LABORATORY GROUP INTERACTION AND PERSONAL RESPONSIBILITY

A maximum of 20 points will be awarded for cooperative and responsible laboratory behavior. Ten points for Learning Interactively will include, but not be limited to working cooperatively and interactively with your colleagues, sharing of techniques and data, and serving as a resource for others. Ten points for Personal Responsibility will include arriving on time and prepared for lab, and observing all safety and waste disposal procedures. These include, but are not limited to having goggles and always wearing them in the lab, maintaining your drawer with clean glassware, keeping track of your assigned glassware, cleaning up at the end of the lab period, carefully dispensing chemicals and always replacing lids, and disposing of lab waste in the appropriate containers.

G. LAB GRADING:

This is a laboratory science course that may be used to satisfy college requirements. To meet these requirements and to meet prerequisites of subsequent courses, you must obtain a passing grade average in the laboratory component of the course to qualify for a passing grade overall. This total will be used as one component in calculating your overall course grade, as specified above in this syllabus; a separate laboratory grade will not be recorded on your transcript.

Component	Points (Total:180)	Note
Lab Reports	140	2 at 10 pts. + best (6 of 7) 20 pt. labs
Laboratory Notebooks	20	2 x 10 pts.
Group Interaction	10	See F., above
Personal Responsibility	10	See F., above

Tentative course schedule: See each Unit Syllabus for revisions.

The last day to drop without a transcript entry is 10/10; the last day to withdraw (W grade) is 11/8.
