

Downloading R and RStudio

Downloading R (DO THIS BEFORE DOWNLOADING RStudio)

- ◇ Go to <https://www.r-project.org/>
- ◇ Click CRAN (Comprehensive R Archive Network)
- ◇ Select a site (preferably one near you, in other words, in the USA)
- ◇ Select your operating system
- ◇ Windows users click on “install R for the first time” or “base” (Mac and LINUX make the appropriate selections for your system, videos are available on youtube if you are uncertain)
- ◇ Windows users click download R x.x.x for Windows and install

Downloading RStudio (MAKE SURE YOU HAVE DOWNLOADED R FIRST)

- ◇ Go to <https://www.rstudio.com/>
- ◇ Click Download RStudio
- ◇ Scroll down to Installers for Supported Platforms
- ◇ Click on the appropriate link for your operating system (There are some prices on this page, but you are downloading RStudio Desktop which is Open Source and free)

Let the coding begin!!!
